

TANUSHREE S M

+91-8660241983 — tanushreesm27@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | Davangere, Karnataka

Professional Summary

Final-year B.E. student specializing in Artificial Intelligence and Machine Learning with hands-on experience in Java, Python, Data Structures and Algorithms, Machine Learning, Deep Learning, and Generative AI. Developed AI-powered applications using FastAPI, Streamlit, FAISS, TensorFlow, and OpenAI APIs. Strong interest in building scalable AI solutions and continuously improving problem-solving and software development skills.

EDUCATION

B.E. – Artificial Intelligence and Machine Learning	Jun 2023 – Jun 2027
Bapuji Institute of Engineering and Technology, Davangere (VTU, Karnataka)	CGPA: 9.31 / 10
Class 12 – Science (PUC)	Mar 2023
KSPUC – Karnataka Board of Pre-University Education	92.00%
Class 10 – SSLC	Jun 2021
KSEEB – Karnataka Secondary Education Examination Board	96.48%

TECHNICAL SKILLS

Languages	Python, Java
Web Technologies	HTML, CSS, JavaScript
AI / ML	TensorFlow, Keras, Scikit-learn, NumPy, Pandas, RAG, FAISS
Databases & BI	MySQL, Power BI
Tools & Platforms	Git, GitHub, Google Colab

PROJECTS

QA RAG System Using Generative AI Apr 2026 – May 2026

Tech Stack: Python, FastAPI, Streamlit, OpenAI API, FAISS, RAG, Semantic Search

- Built a Retrieval-Augmented Generation (RAG) based Question Answering system for document-aware response generation.
- Utilized OpenAI embeddings and FAISS vector search to retrieve contextually relevant information from PDF documents.
- Integrated FastAPI, Streamlit, and vector search to generate accurate, context-aware responses using a Large Language Model.

Maize Disease Detection and Pesticide Recommendation Sep 2025 – Nov 2025

Tech Stack: Python, TensorFlow, Keras, **ResNet50 (Transfer Learning)**, Kaggle Dataset, Google Colab — **Team of 4**

- Built a maize disease detection system using a pre-trained **ResNet50** model through transfer learning to classify maize leaf diseases and recommend suitable pesticides.
- Trained and validated the model on a Kaggle dataset; implemented image preprocessing and data augmentation pipelines using TensorFlow and Keras, achieving **92% classification accuracy**.
- Designed the end-to-end pipeline from image preprocessing and disease prediction to pesticide recommendation.

INTERNSHIPS & TRAININGS

AI and Machine Learning Internship Program – WayEva Online Mar 2025 – Apr 2025

Built and evaluated 3+ ML models using Python and Scikit-learn, improving prediction accuracy by ~15% through feature engineering and preprocessing optimization.

Vision with Python – Practical Training, BIET Davangere Oct 2025 Workshop on NLP and GenAI – BIET Davangere Apr 2026

CERTIFICATIONS

• Hashgraph Developer Course – The Hashgraph Association	Nov 2025
• SQL – HackerRank	Mar 2026
• Introduction to Deep Learning – Infosys Springboard	Jan 2026

ACHIEVEMENTS

Selected among top 4 teams in the internal college round of Cognizant TechnoVerse Hackathon	<i>Apr 2026</i>
Qualified in the internal selection round of Smart India Hackathon (SIH) at college level	<i>Nov 2025</i>
Department Rank 2 (CGPA: 9.31/10), AI and ML, BIET Davangere	

CO-Curricular Activities

Participated in AI/ML hackathons and technical workshops on Computer Vision, NLP, and Generative AI.
